# Vineet Verma
Tech-Savvy B.Tech Student Eager to Build Impactful Software Solutions
+919140577031  •  vermavineet9140@gmail.com  •  https://www.linkedin.com/in/vineetvermacode  •  Greater Noida

## Professional Summary

Motivated B.Tech IT student with a solid foundation in Java, Python, and web technologies. Experienced in real-time app development and machine learning models. Skilled in problem-solving, web development, and cybersecurity, with strong adaptability and communication skills. Eager to contribute to innovative solutions in fast-paced environments.

## Education

**GL Bajaj Institute of Technology & Management**                       Greater Noida
Bachelor of Technology (B.Tech) in Information Technology               2021 - 2025
- Aggregate: 8.1 CGPA

**Sri Sai Inter College**                                              Barabanki
Intermediate (XII)                                                      2019 - 2020
- Percentage: 80 %

**Pioneer Montessori High School**                                     Barabanki
High School (X)                                                         2017 - 2018
- Percentage: 90.6 %

## Projects

**Sign Language To Text Converter**

In this project, I developed a CNN model for realtime gesture recognition to convert sign language into text. I also implemented a recommendation word system to enhance accuracy, showcasing my skills in machine learning and commitment to accessible technology.
- Achieved high accuracy in gesture recognition using a CNN, enabled real-time sign language to text conversion, enhanced user experience with a recommendation system, and promoted awareness of accessible communication.

**Real Time Chat Application with Push Notification**

Created a real-time chat application using Java, integrating Firebase for push notifications and CometChat SDK for seamless communication. This project enhances user engagement through instant notifications, demonstrating my skills in software development.
- Enabled instant messaging for real-time communication, improved user engagement with push notifications, achieved robust integration of Firebase and CometChat SDK, and enhanced overall experience with a user-friendly interface.

## Skills

Languages:  Java(Core), C & C++, Python , Javascript , SQL
Technology:  React.js , Node.js , Tailwind , MySQL
Core-Subjects: Computer Network , Operating System , OPPs
Others: Git , Github
Soft-Skills: Problem-solving, Communication, Teamwork, Adaptability

## Certification

Applied Cloud Computing for Software Development – Edunet Foundation          Java Programming – Udemy
Cyber Security Virtual Internship – Pala Auto                                 Python Programming - Udemy
